

Use the guide below to determine which dimensions are suitable for your project.

The sizes shown are standard and common sizes in the printing world. These particular sizes are tailored to be imposed onto a large sheet in order for cost efficient printing. Of course you can make your project custom size, however do keep in mind that this may have an impact on pricing.

These page dimensions are **trim** size, if the document you are setting up requires bleed this will add another 3-5mm to each edge (SRA3 is the largest size available, no additional bleed can be added to this size).

For detailed instructions on creating print ready PDF files with bleed and crop marks, we have a how-to guide available under the Resources tab on our website, or simply click [here](#).

Business Card (BC): 90mm x 55mm  
A7: 105mm 74mm  
A6: 148mm x 105mm

DL: 210mm x 99mm  
A5: 210mm x 148mm  
A4: 297mm x 210mm

A3: 420mm x 297mm  
SRA3: 450mm x 320mm
